

Open Seminar

Sundsvall January 28th 11.00
Mittuniversitetet Lecture hall NI09

Wood Mechanics and the Implications for Refining

**David McDonald, Former Vice-President Research & Education
FP Innovation / PAPRICAN – Pulp and Paper Research Institute of Canada**

David McDonald was the vice-president, university programs and strategic partnerships, at FP Innovations – Paprican until his retirement at the end of 2009. McDonald has published over 60 papers in refereed journals. He is a fellow of both TAPPI and PAPTAC and has received many awards including PAPTAC's highest technical award, the John Bates Gold Medal. Dave is a Senior Advisor for the Marcus Wallenberg Prize and, as a physics graduate student, he was supervised by Bertram Brockhouse the 1994 Nobel laureate in physics. And now, David is kind enough to stop by FSCN to give a seminar on Wood Mechanics and the Implications for Refining.

The Seminar will be in English!
